

Our February 2004 Employee of the Month has been employed since June 17, 1985.

“Gary has been an employee for 18 years. His teamwork is exemplified by the responsibility he has every year of working with numerous departments and individuals to draft the Township’s Capital Improvements Program. He has demonstrated initiative by being the first person in the Planning Department to obtain professional certifications as a State of Michigan Professional Community Planner and national certification from the American Institute of Certified Planners.

Gary’s quality of work is reflected in the fact that he has successfully drafted hundreds of reports which are scrutinized by Township officials and the general public. The workload in the Planning Department necessitates that Gary be productive. Gary has served the Township well on various committees at the Tri-County Regional Planning Commission. His computer expertise has been an invaluable resource to the Planning Department. Gary has good people skills and handles citizens well at the counter when they are upset.”

It is with great pleasure that we present Gary Bozek of the Planning Department with our February 2004 Employee of the Month award.
